OBJECTIVE

Full-Stack Developer in the making, blending strong frontend expertise (**React, JavaScript, HTML, CSS**) with backend development (**Node.js, Flask**) to build seamless, scalable digital experiences. Focused on performance, clean architecture, and solving real-world problems through efficient and user-centric solutions.

Technical Skills

Languages: Java, Python

Frontend: HTML5, CSS3, JavaScript, React.js

Backend: Node.js, Flask, Spring Boot

Databases: MySQL, MongoDB

Tools: Git, GitHub, VS Code, Eclipse, Postman

Core Skills: Problem Solving, Team Collaboration, Communication

INTERNSHIP

Python Developer Intern (Remote)

Dec 2025 – Feb 2026

Aivariant

Developed a Rental Management System using Flask and MySQL, building RESTful APIs for user authentication (OTP-based), property management, booking workflows, and admin controls, along with a responsive frontend for dashboards, profiles, and payments.

CERTIFICATIONS

Java Full Stack Developer

Jan 2026 – June 2026

IT Vedant

Completed comprehensive training covering frontend (HTML, CSS, JavaScript, React) and backend technologies (Java, Spring Boot, MySQL), with hands-on project development and real-world application building.

PROJECTS

Hostel Management System

Oct 2025 – Present

A full-stack web application built using HTML, CSS, JavaScript, and Node.js with MySQL for database management. Implemented CRUD operations for managing student records, room allocation, and hostel data.

Live Demo : View Project 

Rental Management System

Jan 2026 – March 2026

Developed a rental management platform using Python Flask with HTML, CSS, and JavaScript, integrating MySQL for data storage. Enabled efficient handling of tenant and property records with secure CRUD functionality.

GitHub: Repository Link 

Movies Web Application

March 2026 – Present

Built a dynamic movie web application using React, Node.js, and MongoDB. Implemented REST APIs for seamless frontend-backend communication and efficient data handling.
